- ◆ FedEx Home Delivery

Ongoing carrier compliance is one of Varsity's top priorities. Varsity works directly with customers and carriers to ensure the most timely rate updates and critical compliance changes to labels, manifests, service types, and value-added services.

### FedEx U.S. Carrier Compliance Kit (CCK)

Varsity's FedEx shipping application is designed to transparently support FedEx shipping requirements for U.S. origin shipments via FedEx Express and FedEx Ground.

Varsity's latest FedEx U.S. CCK is designed to work in conjunction with the FedEx Rate Server (FSMS) to process rating transactions, generate tracking numbers, and transmit shipment data to the FedEx mainframe. A seamless TCP/IP connection provides access to the most up-to-date rate, ZIP Code™, and zone data available through FSMS. FedEx shipping rules and restrictions are automatically applied to ensure compliance and timely delivery. Additional charges are applied as required. Shipment data is captured in an electronic manifest report that is uploaded daily to FedEx via FSMS. Specialized, certified-compliant FedEx shipping labels are generated on a thermal printer and end-of-day FSMS reports can be easily printed.

With Varsity's optional Export Documentation module, it is possible to automatically generate the required export documents based on shipping requirements and compliance rules. Documents available include Canadian Customs Invoice, Certificate of Origin (NAFTA and Standard), Commercial Invoice, and Shipper's Export Declaration.

### Certification Level

Varsity's FedEx U.S. CCK is fully certified with FedEx for compliant shipping up to version 072x of the FSMS Rate Server. Varsity is proud to be a FedEx Compatible Solutions Program Partner.
